

We maintain a good stock of all plastic and glass lenses used in our range of laser diode products.

Why don't you contact our Sales Team to see if one of our standard lenses will suit your laser diode application?

If you need a lens for a special application we can manufacture it.

We supply flat and spherical lenses, prisms, cubes, wedges, windows and many more optical components.

Customer Solution

Since 1957, our partner is in the industrial optic's market, with all its manufactured products and on behalf of a third party process.

We have the major technologies applied in this field, either traditional machinery or CNC units, balancing to make computerised and precision working, where also experience and skilful operators play a very important rule for the right result of them. Thanks to a pluridecennial experience and to the considerable capital outlay for the search of new resources, nowadays The company is able to satisfy the most various requests. And is able as well to provide a technical support to Customers, through a consultation and advanced optical calculation service, supported by state-of-the-art sophisticated Optics Cad software.

To work at its highest level the company decided to adopt and follow a Quality System, in order to guarantee to the customers a total quality on its products; we in fact have just got the UNI EN ISO 9001/2000 certificate from DNV.
