

CARADAR®

Protects you and your vehicle

Positioning

The protected property can be located by the owner worldwide. In combination with a Bluetooth-capable mobile telephone, it also serves as a GPS navigation system.

Theft

If the protected property is stolen, the owner and up to three other numbers (e.g., partner, dispatcher) immediately receive a theft notice with supplemental information. With the help of CARADAR prompt action can be taken.

Accident

All it takes is a phone call or pressing the emergency button, and our dispatch office (24 hours a day, 365 days a year) takes over the coordination of the emergency services (Gold, Platinum). Because of substantial time savings as a result of precise positioning, lives can be saved.

Breakdown/Emergency

Our dispatch office coordinates further steps in accordance with the customer's request and notifies the personal physician, other individuals as requested, and, if required, organizes a replacement vehicle or also a hotel room (Gold, Platinum). Any additional costs are covered by the integrated Europe-wide mobility guarantee (Platinum).

CARADAR® was introduced at the International Motor Show Geneva 2007 and at Swiss-Moto 2008 as the first of its kind in the world

Where is my vehicle?

CARADAR knows, always!

CARADAR combines a theft protection and security system in one. The technical features and the ability to use the system without subscription charges (Silver) make CARADAR an unrivalled product in its field – for private customers as well as for companies such as construction/agriculture, rental cars, armored cars, etc.

The small device installed permanently in a vehicle functions worldwide in automobiles, motorcycles, trucks, ships, etc., and notifies the owner of any unauthorized movement or manipulation of the property. When an alert is received by the dispatch office, all further steps are coordinated automatically. The system can also be used in parallel by the user himself.

Several insurance companies offer reduced premiums where CARADAR is installed.
